

ERIC BOWSER

Full Stack Software Engineer | Cloud Architecture | Mobile Development
Salt Lake City, UT | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 10+ years of expertise in C#/.NET, React, Node.js, and cloud architecture. Proven enterprise track record at Maersk and Willis Towers Watson delivering high-performance APIs, database migrations, and React component systems at scale. Currently building and shipping production SaaS applications, mobile apps, and affiliate platforms as founder of Execute & Engrave LLC, spanning full-stack web, React Native mobile, and cloud-native deployment.

CORE TECHNICAL SKILLS

Backend: C#/.NET Core 8, ASP.NET Core Web API, Node.js, Express.js

Frontend: React.js, TypeScript, JavaScript, HTML5/CSS3, Tailwind CSS, Bootstrap

Mobile: React Native, Expo SDK 54, Android (Kotlin config plugins), GPS/Location Services

Desktop: WPF/XAML, MVVM Architecture, Windows Forms

Cloud & DevOps: Azure (App Service, Functions, Cosmos DB, Key Vault, DevOps), GitHub Actions, Docker, NGINX, CI/CD

Databases: SQL Server (T-SQL, execution plans, indexing), PostgreSQL, Cosmos DB, MongoDB, Entity Framework Core, Dapper

Security: JWT/Auth0/OAuth2, SSL/TLS, Cloudflare, DNS routing, secure API design

Testing & Tools: xUnit, Jest, React Testing Library, K6 load testing, Swagger/OpenAPI, Git, Agile/Scrum

PROFESSIONAL EXPERIENCE

Execute & Engrave LLC — Independent Software Developer & Founder

Full-Stack Web, Mobile & Cloud Development

Jan 2024 – Present

DocuCreate — Lease Agreement SaaS Platform ([docu-lease.com](#))

- Built multi-step lease wizard generating state-informed agreements for all 50 US states with PDF export and e-signature flow
- Developed Express API with encrypted document storage, access-token authorization, and landlord recovery system
- Integrated Stripe payments (opt-in monetization), Nodemailer email service with Gmail OAuth, and SEO blog
- Stack: React 18, Vite, Tailwind CSS, React Hook Form, Express, @react-pdf/renderer, Stripe

Western Rockhound — Affiliate Marketing Platform ([rockhoundutah.com](#))

- Launched affiliate review site covering metal detectors, rock hammers, GPS units, and field gear for Western US terrain
- Built interactive Detector Match Quiz engine scoring products against user preferences with ranked recommendations
- Implemented SSR pre-rendering with react-snap, Express API, sitemap generation, and Google Maps integration
- Stack: React, Vite, Tailwind CSS, Express, Amazon Associates, react-snap

TrackMoto — Motorcycle Tracking Mobile App (Google Play)

- Developed React Native/Expo mobile app for motorcycle riders: real-time GPS speedometer, mileage logging, and document/receipt management
- Integrated expo-location for live speed tracking, expo-image-picker for receipt capture, and AsyncStorage for offline persistence
- Configured EAS Build for Android APK/AAB generation and Google Play Store deployment
- Stack: React Native, Expo SDK 54, TypeScript, expo-router, expo-location

GigSwitch — Gig Worker Command Center (Android)

- Built Android command center for gig workers to switch between DoorDash, Uber Eats, and Instacart with notification-based activity tracking
- Developed custom Kotlin notification listener service with React Native bridge for real-time offer/status detection
- Created Expo config plugins for Android manifest queries and native module injection
- Stack: React Native, Expo SDK 54, TypeScript, Kotlin, EAS Build, custom native modules

CloudPrepper — Cloud Certification Study Platform

- Architected full-stack LMS for CompTIA Cloud+ and AWS certifications with flashcards, practice exams, and spaced repetition
- Developed Node.js/Express API with PostgreSQL, JWT auth, and Docker containerization
- Stack: React, Tailwind CSS, Node.js, Express, PostgreSQL, Docker

Pet ID Tags / laser-tags.com — Full-Stack Application

- Designed full-stack app for smart pet ID tags with QR code generation, PostgreSQL schema, and JWT authentication
- Stack: React, Node.js/Express, PostgreSQL, Docker, JWT

Visible Supply Chain (Maersk)

Supply Chain / Integrations Specialist

Feb 2023 – Dec 2023

- Migrated .NET Standard 4.61 hybrid application to .NET Core 7.0 for Azure deployment, architecting microservices for carrier API integration (USPS, FedEx)
- Executed PostgreSQL-to-Azure Cosmos DB migration with optimized NoSQL schema, Key Vault authentication, and zero-downtime deployment
- Reduced API response times by 40% through in-memory caching, LINQ optimization, and strategic SQL Server index tuning
- Built multithreaded carrier API processing with retry/circuit-breaker patterns and NLog monitoring
- Implemented Azure DevOps CI/CD pipelines for automated testing and deployment

Willis Towers Watson

Full Stack Software Engineer

2016 – Aug 2022

- Led migration of legacy .NET applications to .NET Core, improving performance by 30% while maintaining backward compatibility
- Architected RESTful APIs with Microsoft Identity, Auth0, JWT authentication, and Swagger/OpenAPI documentation
- Developed enterprise React.js component library with TypeScript: 50+ reusable components, reducing development time by 25%
- Managed Entity Framework Core with advanced LINQ, SQL Server profiling, and strategic index optimization
- Maintained CI/CD with TeamCity builds and Octopus Deploy pipelines; SumoLogic for performance monitoring

CERTIFICATIONS & EDUCATION

CompTIA Cloud+ (CV0-004) — In Progress

AWS Certified Solutions Architect – Associate (SAA-C03) — In Progress

Weber State University — B.S. Computer Science (Software Engineering & Network Security), 2011–2014
